Education

University of Central Florida

Orlando, FL

B.S. in Computer Science

August 2024 – Expected Summer 2027

GPA: 3.59

Relevant Coursework: Computer Science I & II, Systems Software, Object-Oriented Programming, Computer Logic & Organization, Security in Computing, Discrete Structures, Calculus I & II, Linear Algebra, Statistical Methods I & II, Physics I & II

Broward College

Davie, FL

Associate of Arts (A.A.)

Graduated 2024

Dean's List; completed concurrently with high school through the College Academy program

Technical Skills

Programming: C, C++, Java, Python

Tools & Technologies: Git/GitHub, Linux, Logisim

Areas of Knowledge: Data Structures & Algorithms, Systems Programming, Object-Oriented Programming, Computer Organization, Technical Writing

Languages: English (Fluent), Spanish (Fluent)

Research Experience

Undergraduate Research Assistant

Fall 2025

University of Central Florida

- Participated in research focused on belief extraction and annotation analysis
- Evaluated semantic similarity and consistency between predicted and ground-truth datasets
- Worked with structured datasets and annotation workflows for machine learning research
- Collaborated with graduate researchers to improve data quality and evaluation accuracy

Projects

AI Fitness & Recovery Tracker | React, Node.js, PostgreSQL, REST APIs

- Developing a full-stack web application integrating workout tracking, nutrition logging, and sleep monitoring
- Implementing authentication, analytics dashboards, and AI-powered recovery insights
- Building responsive frontend interfaces and scalable backend systems

AI Bug Explainer / Developer Assistant | Python, React, OpenAI APIs, C/C++

- Designing an AI-powered debugging assistant for compiler, runtime, and logic errors
- Developing support for C/C++ systems programming workflows and contextual code analysis

Personal Portfolio Website | React, Tailwind CSS, JavaScript

- Building a responsive portfolio website showcasing projects, technical skills, and research experience
- Developing reusable UI components and integrating GitHub repositories and project demos

Systems Programming Projects | C, C++, Linux, Git

- Developed systems-level programs involving parsing, recursion, memory management, and shell behavior
- Built compiler- and operating system-related projects in Linux using command-line tools and Git

Experience

Intern

August 2020 – August 2024

iPhonect

Davie, FL

- Performed diagnostic testing and troubleshooting on consumer electronic devices
- Assisted technicians in repairing consumer electronics and hardware issues
- Supported sales, inventory management, and customer service operations

Vice President

2023 – 2024

Broward College Aerospace Club

Davie, FL

- Led meetings and educational presentations on aerospace and engineering fundamentals
- Collaborated with team members to build and test prototype aircraft

Pianist / Performer

2013 – 2024

Independent

Miami, FL

- Studied piano performance and music theory for over 10 years
